

REQUEST FOR INFORMATION (RFI-001)

Project: Coconut Export Manager

Subject: Requirement for Order Data Storage and Retrieval

Date: 28 July 2026

Description

The requested regarding the requirement for storing and managing order information within the application.

The application requires the capability to create, save, retrieve, update, and delete order records. The data entered by the user must remain available after the application is closed and reopened, also to be exported in CSV file format.

Information Requested

Please confirm the following requirements for the Order Entry module:

1. Order Number Generation

- The Order Number shall be generated automatically by the system.
- Users shall not be required to manually enter the Order Number.
- Order Numbers shall be sequential within each calendar month.
- Numbering shall commence from **1** at the beginning of every new month.
- The sequence shall continue until the last order created within that month.
- Changing the Order Date to another month shall automatically assign the next available Order Number for the selected month.

Example:

Month	Order Numbers
July 2026	1, 2, 3, ... 50
August 2026	1, 2, 3, ...
September 2026	1, 2, 3, ...

2. Order Date

- The Order Date shall automatically display the current date upon opening the Order Entry screen.
- The default date shall follow the **Indian Standard Time (IST)** time zone.
- Users shall be able to modify the Order Date using a calendar/date picker.
- Upon changing the Order Date, the Order Number shall automatically update based on the numbering sequence for the selected month.

3. Loading Date

- The Loading Date shall initially remain blank.
- Users shall be able to select the Loading Date using a calendar/date picker.

4. Confirmation Date

- The Confirmation Date shall initially remain blank.
- Users shall be able to select the Confirmation Date using a calendar/date picker.

5. Actual Loading Date

- The Actual Loading Date shall initially remain blank.
- Users shall be able to select the Actual Loading Date using a calendar/date picker.

6. Order Entry Screen Layout

Please confirm that the Order Entry screen shall contain the following fields in the order listed below:

1. Order Number (Auto Generated)
2. Order Date
3. Loading Date
4. Seller
5. Buyer
6. Confirmation Date
7. Actual Loading Date
8. Rate
9. Quantity
10. Status
11. Remarks
12. Save Button

7. Status Field

Please confirm that the Status field shall provide predefined selectable values (e.g., Pending, Confirmed, Loaded, Delivered, Cancelled).

Conclusion

We are open to exploring any suitable development approach that fulfills the functional requirements of the application. The priority is to deliver a reliable, user-friendly, scalable, and cost-effective solution. We welcome recommendations for the most appropriate implementation based on the project requirements, with a focus on achieving the desired functionality within a budget-friendly cost.

Please review the requirements and suggest:

- The approach you recommend.
- The estimated development timeline.
- The total development cost.
- Any recommendations or improvements you feel would benefit the application.

We look forward to your proposal.
